

AMETEK (GB) Limited Carbon Reduction Plan

Supplier name: AMETEK (GB) Limited

Publication date: February 4, 2026

Commitment to achieving Net Zero

AMETEK (GB) Limited is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2019	
Additional Details relating to the Baseline Emissions calculations.	
AMETEK (GB) Limited's baseline includes Scope 1 and 2 emissions which are calculated in accordance with the Greenhouse Gas Protocol. Our GHG inventory covers emissions from all sites under operational control. We are in the process of evaluating our Scope 3 emissions and will report on the relevant sources in the future.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	81.4
Scope 2	147.2
Scope 3 (Included Sources)	TBD
Total Emissions	228.6

Current Emissions Reporting

Reporting Year: 2025	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	78.2
Scope 2	29.3
Scope 3 (Included Sources)	TBD
Total Emissions	107.5

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets:

We have set a goal to achieve net zero emissions by 2050 across our value chain.

Progress against these targets can be seen in the graph below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

We recognize the importance of addressing climate change and are taking significant steps to achieve our GHG reduction goals. Our approach to decarbonizing our operations includes:

- Focusing on optimizing our processes and equipment to improve energy efficiency
- Increasing procurement of renewable energy sources
- Transitioning from fossil-fuel-powered equipment to electric-powered alternatives and low-carbon fuels

AMETEK (GB) Limited is committed to reducing the environmental impact of our operations and has taken several measures over the last few years to improve our energy efficiency and reduce overall emissions.

The following environmental management measures and projects have been completed or implemented since the 2019 baseline. The carbon emission reduction achieved by these schemes equate to 121.1 tCO₂e, a 53% reduction against the 2019 baseline and the measures will be in effect when performing the contract.

Completed projects include:

- Procurement of 100% renewable electricity through green power contracts at our main facilities
- Implementation of a new car policy to encourage the selection of fully electric or hybrid vehicles
- Installation of electric vehicle charging stations at our sites to support and encourage zero emissions travel
- Retrofit old buildings/facility upgrades including new windows to reduce energy consumption
- Installation of new energy-efficiency lighting systems

In the future we hope to implement further measures such as:

- Continue to optimize our processes and equipment to improve energy efficiency
- Engage in various energy efficiency measures such as energy audits and LED lighting upgrades
- Explore on-site clean energy generation such as solar photovoltaic systems
- Increase the amount of electricity from renewable sources through strategic procurement practices
- Replace propane forklifts and diesel-powered backup generators with electric alternatives
- Further increase the number of hybrid and electric vehicles in our fleet
- Optimize transportation logistics to reduce environmental impact

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

A handwritten signature in black ink, consisting of a large, stylized initial 'M' followed by a series of loops and a long horizontal stroke.
